PERSONAL SUMMARY

Application Support Engineer with 5+ years of experience in L2 and L3 production support, incident management, root cause analysis, and 24x7 operational support across telecom, retail integration, and enterprise systems. Supported platforms used by 30M+ users, resolved 150+ weekly tickets, and maintained 98% SLA compliance with 99.99% uptime. Strong in SQL, Python, ServiceNow, Remedy, Windows, Linux, log analysis, monitoring, automation, and remote support in SLA driven environments.

WORK EXPERIENCE

Application Support and Data Engineer | Feb 2025 to Apr 2026

Vesaw Infotech | London, United Kingdom

- Delivered application and data support for a major UK grocery retail client, investigating pricing, promotion, and inventory data issues using SQL, Python, and log analysis to keep reporting and downstream systems stable.
- Sourced and validated data from relational databases, REST API endpoints, and CSV, Excel, and JSON files, troubleshooting source to target mismatches, failed loads, and data quality defects across the pipeline.
- Diagnosed production data defects by tracing SQL query outputs, failed batch records, API response gaps, and log errors, then corrected mismatched values and validated results against source systems.
- Partnered with client stakeholders on incident reviews, change validation, and reporting fixes, reducing manual checks through Python and SQL automation.

Operations Engineer | Oct 2020 to Sep 2022

Virtusa | Colombo, Sri Lanka

- Delivered L2 application support for 30M+ MTN users, resolving 150+ weekly service requests through ServiceNow and Remedy while maintaining 98% SLA compliance.
- Reduced MTTR by 35% by investigating incidents through Linux log analysis, Windows event checks, SQL validation, and structured root cause analysis.
- Built live dashboards using Python, R, REST APIs, and SQL based datasets to monitor server health, daily MNP transaction activity, ticket queues, failed transactions, error logs, and SLA performance.
- Identified anomalies, data quality issues, and service risks by analysing high volume subscriber records, transaction logs, and service event datasets using Python and SQL.
- Automated scheduled health checks, log parsing, and status report generation using Python, Bash, Shell scripting, and CRON, reducing manual checks by 40%.
- Monitored application, middleware, and infrastructure logs to detect service issues, batch failures, and abnormal system behaviour, then triaged alerts based on severity and business impact.
- Managed escalations across porting queries, activations, SIM swaps, routing, cancellations, and connectivity issues, communicating clearly with technical and non technical stakeholders during incidents.
- Delivered remote support across distributed environments, working with development and infrastructure teams to resolve complex production issues and maintain consistent service delivery.
- Maintained 99.99% uptime through 24/7 on call support and structured incident management, ensuring prompt resolution of critical application issues.

Associate Operations Engineer | Mar 2020 to Oct 2020

Virtusa | Colombo, Sri Lanka

- Delivered L3 support for enterprise data integration applications using BizTalk EAI, ensuring seamless synchronisation across global retail systems in line with ITIL based support protocols.
- Provided end to end application and operational support, including incident management, service requests, defect resolution, and customer facing issue handling.
- Led onboarding support for new markets, working with cross functional teams to ensure smooth application deployment and integration readiness.
- Managed change activities with stakeholders to implement updates without service interruption.

Trainee Software Engineer | Dec 2019 to Feb 2020

Co operative Insurance Company Limited | Colombo, Sri Lanka

- Supported backend systems handling 150+ queries per minute and improved SQL queries to enhance stability and response time.
- Applied SQL and server side programming to improve transaction handling, data validation, and system stability.

CAREER DEVELOPMENT AND LEADERSHIP EXPERIENCE

(Undertaken alongside MSc studies, UK)

- Store Supervisor | Starbucks | Cheltenham, UK | Nov 2024 to Jan 2025
- Shift Manager | Taco Bell | Cheltenham, UK | Sep 2023 to Nov 2024

- Supervisor | The Range | Cheltenham, UK | Apr 2023 to Sep 2023

EDUCATION

MSc in Data Science | Sep 2022 to Aug 2024

University of Gloucestershire | Cheltenham, United Kingdom

- Merit

BSc (Hons) in Software Engineering | Oct 2016 to Dec 2019

University of Plymouth | Plymouth, United Kingdom

- Second Class Honours Upper Division

PROJECTS

UK Grocery Retail Application and Data Support | Vesaw Infotech

- Supported pricing, promotion, and inventory data workflows for a major UK grocery retailer, resolving production data defects, validating reports, and keeping dashboards reliable for business teams.

CSGI MTN | Virtusa

- Diagnosed MNP transaction failures by tracing signalling flows and analysing system logs across distributed telecom platforms, isolating routing and activation breakdowns.
- Monitored live subscriber requests and investigated delayed or failed porting events using SQL queries and log level checks, improving stability of high volume operations.

McDonald's ITR RIDM L3 Project | Virtusa

- Traced and validated message flows within BizTalk to ensure successful processing across distributed retail systems.
- Executed system level checks and integration testing to detect failures and maintain stable application communication between services.

Scam Detection Platform | University of Gloucestershire

- Built a machine learning email classifier in Python with pandas, NumPy, and scikit learn, processing 10,000+ records and achieving 95% accuracy.

TECHNICAL SKILLS

- Support and Systems: Application support, incident management, problem management, change management, SLA management, RCA, monitoring, production support, on call support, 24x7 operations
- Tools and Platforms: ServiceNow, Remedy, Siebel, Active Directory, Confluence, SharePoint, Teams
- Programming and Automation: Python, Bash, Shell scripting, CRON, REST API
- Databases and Reporting: SQL Server, PostgreSQL, Oracle, MySQL, Snowflake, Excel, Power BI, Tableau
- Operating Systems: Linux, Windows
- Cloud and DevOps: AWS, Azure, Docker, Kubernetes, Git, Apache Tomcat
- Remote Work Capabilities: Remote troubleshooting, distributed team collaboration, incident handling across time zones

MEMBERSHIPS

- Institution of Engineering and Technology
- British Computer Society

CERTIFICATIONS AND AWARDS

- Developing a Google SRE Culture by Google
- Statistics by Stanford University
- Two Service Excellence Awards at Virtusa for excellence in project execution
